

Community Gardens News Letter – 2026

The Community Garden Plots are tentatively scheduled to be tilled during the last week of April or the first week of May. Once a firm timeframe is established it will be posted on the city website. After the plots are tilled and sectioned off, it will again be announced on the city website. Note that this timeline is subject to change due to unforeseen circumstances such as heavy rains or other factors that do not permit the tilling of the garden plots.

The garden plots are located on the north side of the Water Treatment Plant on North Gamble Street. Use the drive to the old ball field, you will see the Community Gardens sign near the drive entrance. Gardeners are permitted to drive along the garden plots in the grassy area to access their plot(s). Please refrain from driving in the grassy area after rain events to avoid damaging the lawn.

Rain barrels are located at the front of the tool shed for watering your plants.

Gardening tools are available. The tools are in the tool shed. To borrow and use any of the tools please visit the utility office and sign out a key to access the garden tools stored in the tool shed.

Garden plots can be reserved for the next growing season by calling into the utility office at the end of the season. This permits anyone wishing to continue to improve a plot the ability to retain the same plot that they may have invested in by adding compost, topsoil, or other ground improvements.
